DETAILED ACTION

The response filed 9/27/04 has been acknowledged. No claim is amended. Claims 12, 13, 15-24, 28-35, 37, 39-51, and 54-66 are pending and under current examination. Previous rejections of record under 35 USC § 103 are withdrawn in view of the response.

The following is an examiner's statement of reasons for allowance:

Claims 12, 13, 15-24, 28-35, 37, 39-51, and 54-66 are drawn to an immunogenic preparation comprising a complex of a) a plasmid containing a nucleic acid encoding and expressing ORF1 and/or ORF2 of type II porcine circovirus (PCV2); b) an adjuvant that is either a cationic lipid of a particular formula encompassing DMRIE or a carbomer; and methods of using such preparation for inducing immune response in a porcine host. Although the combined teachings of *Poet et al* (US 6,287,856), and *Meehan et al* (J Gen Virol 1998;79:2171-79), in view of *Nabel et al* (US 5,910,488) suggested administering to a porcine host a plasmid vector expressing PCV2 viral protein and combined with the recited adjuvant, the combined teachings of prior art of record fail to disclose whether such an immunogenic preparation could indeed or would have a reasonable expectation of success to induce an immune response against PCV2 virus in the porcine host. Therefore, the prior art of the record does not teach the claimed invention. It is further noted such teaching and suggestion were provided in the present specification (see particularly working example 10).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Claims 12, 13, 15-24, 28-35, 37, 39-51, and 54-66 are allowed.
